

Project Requirements Document: MarkIt

Benjamin Taylor – Google Business Intelligence

BI Analyst: Benjamin Taylor

Client/Sponsor: MarkIt

Purpose: MarkIt maintains an online platform that facilitates previously owned item sales between individual buyers and sellers. Goal is to understand how these buyers and sellers use their platform. Insights could then inform new-product design and improve the platform.

Key dependencies:

Stakeholders:

Alice Shi, Vice President of Sales
Matías Sosa, Program Manager

Team members:

Ariana Tirado, Data Warehousing Specialist
Cornelia Vega, Manager, Data Governance
Sam Winters, Data Analyst

Stakeholder requirements:

- R: Must include fields for customer ID/username, item category such as clothing or household goods, and date
- D: Should show how long the listings for completed sales are online before the sale is completed
- D: Should be a chart comparing the number of searches made and the amount of sales completed

Success criteria:

Project will be completed in 4 weeks.

Dashboard will be fully functional for the team to view insights into user behavior on both the buyer and seller sides.

User journeys: No information listed, follow-up question

Assumptions: No information listed, follow-up question

Compliance and privacy: No information listed, follow-up question

Accessibility: Dashboard must be accessible. Must have large print and text-to-speech alternatives. Ask follow-up questions for more context

Roll-out plan: Tool must be created in 4 weeks

Week 1: Dataset assigned. Initial design for fields and UserIDs validated to fit the requirements.

Week 2: SQL and ETL development

Week 3: Finalize SQL. Dashboard design. 1st draft review with peers.

Week 4: Dashboard development and testing
